

# Ram Kairam

M.D.

Pediatric Neurology

Years of Experience  
50+ years

## Dr. Kairam's Background & Specialization

Dr. Ram Kairam, is a highly experienced Pediatric and Child Neurologist with decades of clinical and academic expertise. He specializes in pediatric neurology, neonatal-perinatal medicine, and developmental neurology. Throughout his career, Dr. Kairam has provided comprehensive patient care and clinical leadership across hospital systems, academic institutions, and community healthcare settings, while also contributing extensively to pediatric neurology research and clinical trials.

## Professional Experience

Dr. Kairam completed his Pediatrics residency at Harlem Hospital–Columbia University, followed by fellowships in Neonatal–Perinatal Medicine and Child Neurology at Columbia Presbyterian Medical Center and the Neurological Institute of New York. He has held key leadership roles, including Chair of Pediatrics at Lebanon Hospital Center and Chief of Pediatric Neurology at St. Luke's Roosevelt Hospital Center, along with academic appointments at Columbia University Medical Center and New York Medical College.

## Research & Clinical Trial Contributions

Dr. Kairam has actively contributed to pediatric and developmental neurology research, participating in numerous clinical studies on neonatal brain development, pediatric HIV, and neurologic assessments in children. His extensive background in pediatric neurology and neonatal-perinatal medicine, combined with decades of clinical and academic experience, enables him to effectively lead and oversee clinical trials while ensuring regulatory compliance and patient safety. At Revival Research Institute, we are excited to welcome Dr. Ram Kairam as a Principal Investigator. His depth of expertise and long-standing commitment to advancing pediatric neurology research will further strengthen our clinical trial capabilities.
