M.D.

Neurology

Years of Experience
25+ years

Background & Specialization

Dr. Ishaq Ali is a highly experienced neurologist and clinical researcher with more than 25 years of medical experience and specialized expertise in neurology, neurophysiology, and neuropsychiatric research. Throughout his career, he has worked extensively in both hospital-based neurology practice and clinical research settings, treating complex neurological disorders while contributing to advancements in psychiatric and neurological therapeutics.

Professional Experience

Dr. Ali has built an extensive clinical background across leading healthcare institutions in the United States and Pakistan. He currently serves as a Principal Investigator at Revival Research Institute, where he oversees neurological and psychiatric clinical trials.

His professional experience includes serving as a Consultant Neurologist at Comprehensive Neurology Specialists and previously working with TIND, Methodist Hospital Richardson, Medical City Lewisville, and Baylor Scott & White. He also served as a Consultant Neurologist at Rush Foundation Hospital in Meridian, Mississippi.

Research & Clinical Trial Contributions

Dr. Ali has contributed to multiple clinical trials focused on neurological and psychiatric disorders. His research experience includes studies involving Alzheimer's disease psychosis, major depressive disorder, treatment-resistant depression, anhedonia-related depression, and bipolar disorder.

He has served as Principal Investigator on multiple randomized, double-blind, placebo-controlled clinical trials evaluating innovative therapies for central nervous system disorders. His research contributions reflect a strong commitment to advancing treatment options for patients living with neurological and mental health conditions.
