

Grygorii Tsapko

M.D.

Clinical Pharmacology

Years of Experience
20+ years

Dr. Tsapko's Background & Specialization

Dr. Grygorii Tsapko is a highly experienced physician and clinical researcher with over 20 years of medical practice and strong expertise in early-phase clinical research. He specializes in Phase I clinical trials, First-in-Human studies, pharmacokinetics, and bioavailability and bioequivalence research. Throughout his career, Dr. Tsapko has contributed to the successful execution of complex early-phase studies, combining clinical expertise with a deep understanding of pharmacological processes.

Professional Experience

Dr. Tsapko began his medical career with a strong foundation in clinical practice, specializing in Orthopedic Traumatology and gaining hands-on experience in patient care, surgical support, and post-operative management. He has built extensive experience in both clinical practice and research, serving as a Principal Investigator and Investigator in over 30 clinical studies. His work includes conducting Phase I trials, pharmacokinetic assessments, and bioequivalence studies across multiple therapeutic areas such as cardiovascular, metabolic, and pain management.

Research & Clinical Trial Contributions

Dr. Tsapko has played a key role in early-phase clinical research, contributing to more than 30 clinical trials involving healthy volunteer populations, intensive pharmacokinetic sampling, and crossover study designs. His research experience spans a wide range of therapeutic areas, including cardiovascular medicine, metabolic disorders, pain management, and anti-infective treatments. He has also contributed to scientific publications in clinical pharmacology, reflecting his expertise in study design and execution.

Education & Experience

Dr. Tsapko completed his medical education at Luhansk Medical National University, followed by specialization in Orthopedic Traumatology and postgraduate training in Healthcare Management. He has built extensive clinical and research experience, serving as a Principal Investigator and Investigator across early-phase clinical trials. Dr. Tsapko has conducted numerous Phase I studies, pharmacokinetic assessments, and bioequivalence trials, and works in compliance with ICH-GCP and EMA regulatory standards, ensuring high-quality study execution and patient safety.
